REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The closest prior art was found to be Singh et al (US 6,969,701) and Singh et al (US 2004/0256594).
3. Singh et al '701 teaches in the claims and examples azeotropic compositions containing HFO-1234yf and CF₃I. Singh et al '701 however does not qualify as a double patenting reference as the claims are directed to the HFO-1234yf and not the HFO-1234ze. Although these compounds maybe structurally similar. As the applicant describes on page 3, lines 14-18 of the instant specification, the formation of azeotrope-like composition is not an obvious or routine task. It is very difficult to predict the formation of azeotropes. Compounds which readily form azeotropes may have homologs which do not form azeotropes under the same conditions (i.e. temperature and pressure). Thus an obviousness type rejection is not sufficiently supported by the evidence and general knowledge of azeotropic composition.
4. Singh et al '594 teaches compositions containing the HFO-1234ze and even teaches the inclusion of small amounts of CF₃I as a flame suppressant (see par. 52). However, the inclusion of minor amounts of a secondary ingredient does not constitute anticipation or even rendering obvious the applicant's specific thermodynamic state of being azeotropic. The mere suggestion of adding a secondary component to a composition is wholly different from the testing required to determine if an azeotropic composition has formed. As this reference fails to 1) suggest the formation of an azeotrope; 2) teach sufficient amounts of the CF₃I to form an azeotrope; and 3) as the reference clearly does not teach examples or claim such compositions, one would require

hindsight to recognize that larger amounts of the CF3I would form the azeotrope. As such this reference neither anticipated or renders obvious the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
